PORTFOLIO

www.yashgajera.com

September 23rd, 2016

To,

Morgan Stanley
New York City, NY
USA

I am very excited about the possibility of joining Morgan Stanley as Intern.
I learned about this internship position on Linked In.

In my position as Software Engineer with Insignex, I was involved with project research, planning, design and testing within the IOT Product Development team. I wrote firmware in C/C++, bootloader software in QT SDK and USB drivers for embedded circuits for IOT Application. I also worked on web dashboard application based on emoncms for embedded devices. As I became more familiar with the needs of Insignex's clientele I suggested, implemented and maintained test procedures and test scripts for new products.

I am graduating with Masters of Computer Science degree from New Jersey Institute of Technology University. At NJIT, I'm doing on campus job as Software Engineer with Hilin Life Products based in NJIT Enterprise development center. I am part of the design team that works on full stack development of KNOWHEN.com. I wrote Automation Script with use of python and selenium for order processing, Package tracking and emailing to customers.

I believe my technical skills and work experiences qualify me for the Intern Position at Morgan Stanley. Enclosed is my Resume. If You have any questions or concerns, I am available via email (ymg4@njit.edu) or phone (201-850-2539). Also you can look my portfolio at my personal website: www.yashgajera.com any time online. I look forward to meeting you soon. Thank you for your consideration and your time.

Thank you for Your Consideration,
Sincerely,
Yash Gajera
